DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 22 is rejected under 35 U.S.C. 102(e) as being e by Nakamura et al. (US Patent No. 6,411,273).

As to claim 22, Nakamura discloses a display driver (104, 108, Fig. 9) that is mounted on a glass substrate (100, Fig. 9) which display panel is formed and drives the display panel, wherein the display driver (104) is connected to an interconnecting line (113) to which a power source voltage (e.g. VH, VL, Fig. 11) which is supplied to another semiconductor device (105) mounted on the glass substrate (100) is applied, and wherein the display driver includes a plurality of voltage-follower-type operational amplifier circuits (104, Figs. 9 and 11) which generate driving voltage which drives the display panel based on the power source voltage, wherein the voltage supplied through the interconnecting line (113) is gray scale driving voltage, and impedance conversion (112a-112g, Fig. 11) is performed at the display driver (104).

Response to Arguments

3. Applicant's arguments filed 2/15/2005 have been fully considered but they are not persuasive. Applicant argues that Nakamura fails to teach each of the display drivers includes a plurality of voltage-follower-type operational amplifier circuit. However, claim 20 only requires

Art Unit: 2674

a single display driver comprising a plurality of voltage-follower-type operational amplifier circuits and does not require a plurality of driver. It is believed that the broadly claimed structure is still met by Nakamura..

Allowable Subject Matter

4. Claims 2-3, 6-7 and 9-19 are allowed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
